REVIEW

SPRING 1958—VOL. 1, NO. 3

PRESBYTERIAN-ST. LUKE'S

REVIEW

Published quarterly for friends of Presbyterian-St. Luke's Hospital, Chicago. Editorial Office: Presbyterian-St. Luke's Hospital Development Office, 208 S. LaSalle St., Chicago 4, Illinois. Telephone: FRanklin 2-0380.

The Medical Science Research Building—the second step in the development of the new hospital—as viewed from the south across Harrison Street. The Senn and Rawson buildings are seen in the distance.

THE COVER

Looking into the future—the ultimate development of the master plan as it will be seen from West Harrison Street.

This is the third issue of the Presbyterian-St. Luke's Review, a quarterly publication issued in May, August, November and February. The November issue is the Annual Report of the Hospital. Subsequent issues will be devoted to significant departmental developments in the building of this medical center for Chicago and the midwest.

MAKE NO LITTLE PLANS—

they have no magic to stir men's blood, and probably themselves will not be realized. Make big plans; aim high in hope and work, remember that a noble, logical diagram once recorded will never die, but long after we are gone will be a living thing, asserting itself with ever-growing insistency. Remember that our sons and grandsons are going to do things that would stagger us. Let your watchword be order and your beacon beauty.

Motto of Daniel H. Burnham

MAKE
NO
LITTLE
PLANS

PLANNING THE MERGER...

The merger of Presbyterian and St. Luke's Hospitals was an historic event for the City of Chicago. Its significance will only be fully appreciated after completion of the facilities and organization which will make possible significant improvements in patient service and care.

Merger developed rapidly, as has been the experience of other merging hospital institutions throughout the country. There was insufficient time for detailed analysis of all of our needs, yet we immediately undertook the planning of an \$18,500,000 building and rehabilitation program.

We asked the constituency of the hospital to support the program by raising \$7,500,000 throughout the greater Chicago area. This has been virtually completed.

As the details of planning have developed with the leadership of the Board of Trustees, the medical staff, the administration and architects, the urgency for changes in original thinking become apparent. These

thoughts have centered principally in the requirements for ancillary areas to properly serve the hospital beds originally planned and now being completed in the new Pavilion.

Modern laboratories, both clinical and research, are required and in close proximity to the bed area nucleus. Expanded surgical operating facilities are a necessity, and also in easy access of the hospital beds and the intensive therapy areas of the new pavilion.

Instead of the rehabilitation of significant portions of the older buildings, and because of the expanding importance of medical scientific laboratories to good patient care, it has been determined that new building construction should provide these needs, even though additional funds will have to be provided now. We know that this program provides carefully planned modern facilities where they are most needed and with the most creative and economical use of our resources.

THE MEDICAL SCIENCE RESEARCH BUILDING

We are now completing the construction of a new building to provide essential hospital beds for the expanding needs of the community. This was the first step in our physical planning initiated two years ago.

The second step is the development of the Medical Science Research Building to provide the additional ancillary services necessary to operate an 1100 bed institution as well as the expanded teaching and research facilities which our objectives require.

THE SITE

Vacant land available for construction is at a premium, and the beginning of this second step in our planning will be on the only remaining vacant property immediately adjacent to the new hospital Pavilion now being completed. This is the southeast sector of the present hospital site.

THE BUILDING

This building will be the initial stage of a much larger structure which will eventually extend the full length of the property on Harrison Street from Wood Street to the elevated.

The building will be eight stories in height with proper foundations for seven additional floors to be added later for bed capacity as existing older hospital buildings are removed. Primarily the building will house medical laboratories, modern surgical suites and growing administrative departments of the hospital. The structure will embody the very latest in the design of ancillary services providing a maximum of flexibility. Such flexibility is essential to the continual and rapid developments in medical science, and the changing techniques and methods employed toward improved patient care. The details of architectural design and departmental layout are now being developed.

THE COST

It is contemplated that this building including all furnishings and equipment will cost approximately \$4,500,000.

RELATION TO EXISTING BUILDINGS

This new structure will be joined to the present laboratory facilities in the Senn and Rawson buildings on Harrison Street by temporary bridges at several floors. These will, of course, be demolished at the time the next stage of the long-range plan is initiated. That is, the demolition of the present power plant and laundry and the erection of the center building. Eventually with the building of the final stage, complete ancillary services to serve the entire hospital will finally be available at a high standard. This stage envisions the demolition of the Senn and Rawson structures.

The hospital has found it of distinct mutual advantage to have its hospital clinical services and research operations closely related. On inspection of the hospital plot plan, it will be clearly seen that some clinical service laboratories will be best located in this southeast sector of the hospital property complex as the new bed construction moves the center of gravity of bed patients toward that area.

RESEARCH ACTIVITIES

According to the bylaws of the Presbyterian-St. Luke's Hospital, each member of the medical staff takes part in teaching and research activities in his own field of interest. Programs of research are presently being carried forward in the Departments of Pathology, Biochemistry, Radiology and in several branches of Surgery including Orthopedics and studies in blood coagulation. Research goes forward also in divisions of the Department of Medicine including Renal Disease and Metabolism, Hematology, Oncology and Cardiopulmonary Disease. Research programs are being established in the Department of Microbiology including Bacteriology, Virology and Immunology, as well as in the Department of Pediatrics.

Research in health and health-related sciences will require 58% of the total laboratory area in this new building increasing the total combined research areas by 88½%.

Model of the present hospital buildings showing age of present structures and complexities of site.

REALISTIC PLANNING OBJECTIVES

The modern health center embodies a widening scope of patient care and services. The planning of this large research, teaching and referral hospital requires continuing sources of funds to keep it abreast of medical accomplishments. The accurate evaluation of needs with perceptive analysis of the total economic burden is essential to the long-range stability and effectiveness of the institution.

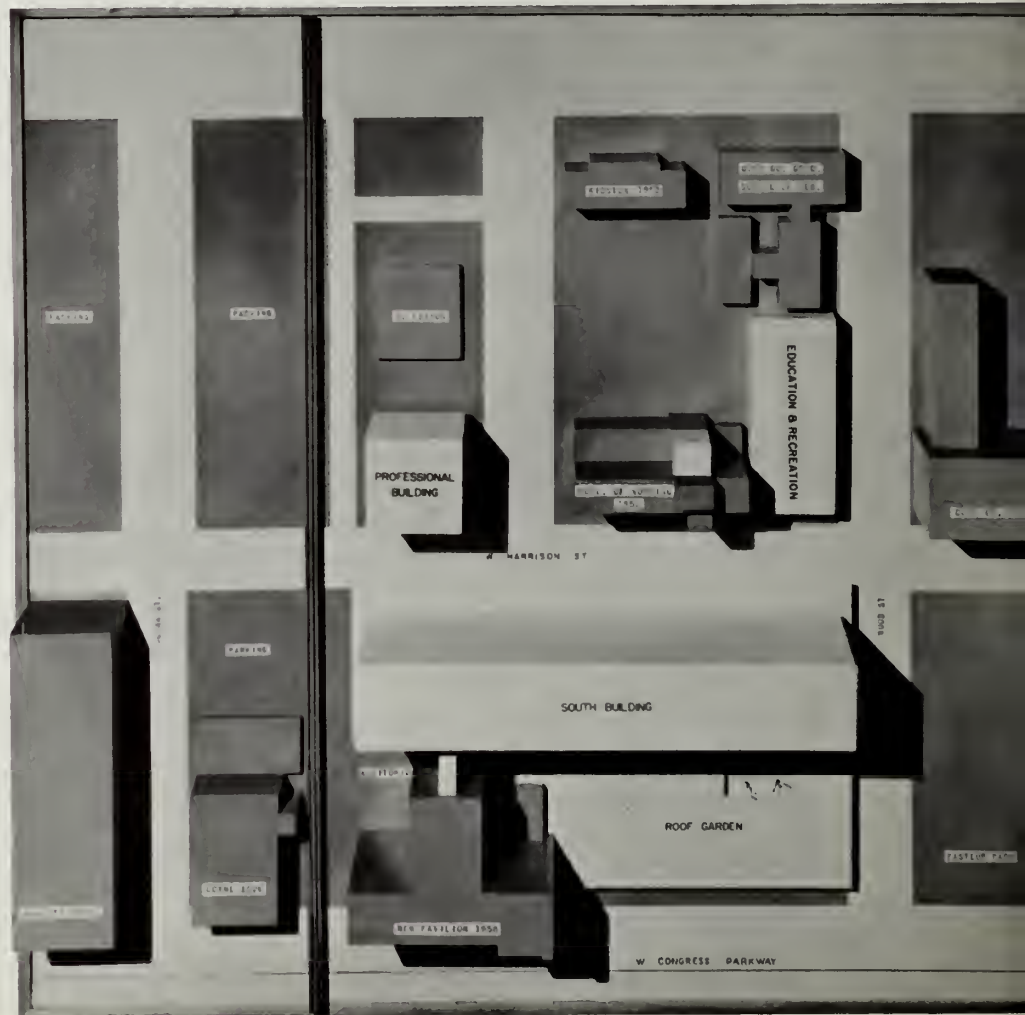

We have established certain basic "rules of the road" in planning the future facilities for Presbyterian-St. Luke's Hospital. These criteria are:

1. Careful analysis should be made of each hospital department to ascertain its present status and relationship with other areas of the hospital and its future program in relation to the needs of the institution and the community.
2. Full-scale hospital operations must be maintained during all alterations and major building programs.
3. The optimum circulation of patients, hospital personnel and the public should be provided.
4. The present site, though limited by outmoded structures, and a lack of immediate vacant land of consequence, is adequate for the long-range development of the hospital.
5. The remodeling on a major scale of any of the older structures should be avoided and dollars best spent in new facilities and equipment.
6. The costs of the project should be kept to a minimum for any interim building as well as for the completion of the ultimate facilities.
7. The highest standard of buildings and equipment should be maintained commensurate with the funds available.
8. An open-mindedness and as complete flexibility as possible should be maintained in all phases of the planning and design.

THE MASTER PLAN

The long-range plan is a formidable one—a plan which provides the ultimate development for the hospital on this site in the Medical Center. It contemplates the eventual demolition of all of the older buildings now on the site, and a gradual replacement of the beds and services in a logical sequence of events.

The plan will provide a total of 900 hospital beds, plus an ultimate addition of 200 minimal care beds for ambulatory patients. The hospital will serve an increased outpatient load, require additional operating room facilities, extend to a considerable degree its laboratories both clinical and research, expand its nursing education program facilities, and provide housing for at least sixty ad-

Model of the ultimate development of the Presbyterian-St. Luke's Hospital.

ditional medical house officers required by the 1100 bed capacity.

The long-range plan calls for the erection of a building the full length of the present property on Harrison Street from the elevated railway to Wood Street. This building with the new bed areas now being completed will eventually contain all of the hospital beds. In the Harrison Street building these will be in the upper portion of the structure from the 9th to the 15th floors. The 8th floor will contain the mechanical equipment for air conditioning and other service components.

It is our firm conviction that we should move as rapidly as possible toward the development of this Harrison

Street building expending major construction dollars in new buildings which can be planned for optimum service instead of costly remodeling in old buildings demanding extensive revamping of both space and utilities.

The lower floors, ground floor through the seventh, will contain laboratories, surgical suites and other ancillary services required to service the bed areas above as well as the ambulatory patients coming into the building each day. We contemplate the development of this building in three basic stages.

The development of this important plan contemplates a total expenditure of \$20,000,000 over the next ten-year period.

Architect's rendering of the ultimate development of the hospital building program.

PLAN FOR THE FUTURE

No Little Plan

THE ANNOUNCEMENT this week of plans for another huge addition to Presbyterian-St. Luke's hospital in the Medical Center area on Congress near Wood at a cost of \$20 million is of tremendous importance to Chicagoans.

This is the second large step in the expansion program that began with the merger of the hospitals, two of the city's oldest, just two years ago.

It will complement the \$18.5 million expansion plan already embarked upon and will ultimately mean the razing of the present main hospital and the Rawson building, the original site of Rush Medical School.

Currently the hospital is completing the first of the projects under the previously announced program—the building of a 13-story pavilion. The new \$20 million project, to be built in three sections over a 10-year period, will be a new main building just south of the pavilion.

Ultimately the program will give the institution 1,100 modern hospital beds. Its impact upon medical care in Chicago will be enormous and far-ranging.

We congratulate John P. Bent, the hospital's president, and his colleagues on their daring and on their faith in Chicago. This is thinking and planning on the grand scale. It is reminiscent of the words of old Dan Burnham, the city planner, who inspired Chicagoans of an earlier day with his "Make no little plans."

We have confidence in the expanding future of Chicago, yet its capacity for virile leadership is integrally related to its ability to cooperatively plan and forecast its future needs for a growing population.

As one of its important service institutions, Presbyterian-St. Luke's Hospital has a vital stake in this city's future. The city's sound growth must be bulwarked by a dynamic development of its institutions for community service and the furthering of scientific and social advancements.

Keeping pace with social changes and economic developments is a severe test for the hospital with a feeling of responsibility for high standards of patient service backed by private or voluntary means of support.

Historically, however, it is this type of institution with the initiative and courage to accept change and working in close association with medical teaching institutions which have provided the proper climate for the nurturing of medical scientific developments and consequent improved patient care.

This newspaper editorial is indicative of the enthusiastic support which the agencies of this community have given us. Many individuals are also unselfishly giving their time, while others are generously donating their dollars to this significant community project.

Dr. William F. Hughes, Head of the Eye Clinic, and Chairman of Presbyterian's Department of Ophthalmology, is examining the fundus, or back of the eye, with a new type of indirect, binocular ophthalmoscope. This is especially important in the diagnosis and plans for surgical treatment of retinal detachment. (Patient in these pictures is portrayed by hospital employee.)

EYE CLINIC

Equipped to handle

any type of eye problem . . .

Modern and functional in design, the hospital's new Eye Clinic is one of the few that serve both clinic and private patients. (An average of fifteen private and twenty clinic patients visit the Clinic daily.) It is equipped to handle any type of eye problem, including cases requiring corneal transplantation and cases requiring treatment of retinal detachment. In addition, the Clinic offers improved potentialities for medical education and clinical research.

CENTRAL DESK UNIT

Decorated in blue-green tile,
it is equally accessible to
all six rooms in the Eye Clinic.

Six rooms—each equally accessible to a central desk unit—include: two general examining rooms primarily for private patients; a minor surgery room; a glaucoma room for performing the latest test, known as Tonography, in the diagnosis and management of glaucoma; a visual field testing room; and a general examining room for clinic patients which has four examination lanes and a niche to treat muscle problems in children's eyes. Adjacent to the central desk unit are two good-sized waiting room areas.

The Eye Clinic is headed by Dr. William F. Hughes, who is assisted by two Residents. Associated with the hospital for ten years, Dr. Hughes is Chairman of Presby-

terian's Department of Ophthalmology, Professor and Head of the Department of Ophthalmology at the University of Illinois School of Medicine.

Blind Service Association, Inc., of Chicago helped to establish this new Eye Clinic through its major contribution to renovation, equipment and furnishings, and through its continuing generous support since 1943.

A Dedication Tea for the Clinic was held last November. Judge Harry G. Hershenson, a member of Blind Service Association's Board and Chairman of the Association's Committee responsible for renovating, furnishing and equipping the Clinic, unveiled the dedicatory plaque.

VISUAL FIELD TESTING ROOM

Equipped with a new projection-perimeter on which Dr. Jack Turnbull, Resident, is testing the peripheral visual fields, or side vision.

This test is important in the diagnosis of diseases of the optic nerve and certain intracranial disorders which press on the visual pathways.

AT THE DEDICATION CEREMONY Judge Harry G. Hershen-
son, right, Board Member of Blind Service Association, Inc.,
presents Citation from his Association to Dr. Hughes in recog-
nition of Dr. Hughes' "exceptional volunteer services in behalf
of the blind." Unveiled dedicatory plaque is in background.

GLAUCOMA ROOM Equipped with new apparatus for the
study of glaucoma. Dr. Vivian Cation, Resident, is perform-
ing a special diagnostic test, "tonography", which estimates
the ease with which aqueous fluid drains from the eye. When
the outflow of aqueous is reduced, the pressure in the eye
increases and "glaucoma" results.

EYE CLINIC

DEDICATED

NOVEMBER 15, 1957

THROUGH THE CONTINUING SUPPORT OF THE
BLIND SERVICE ASSOCIATION INC
AND THROUGH ITS MAJOR CONTRIBUTION
TO RENOVATION, FURNISHINGS AND EQUIPMENT,
THIS NEW EYE CLINIC HAS BEEN ESTABLISHED

MEDICAL STAFF ACTIVITIES

The professional activities of the Medical Staffs are too numerous to permit a complete coverage in this magazine. Following are only a few of the many recent professional activities of the Staffs which have come to the attention of the Editors.

Dr. George P. Guibor presented three papers before Ophthalmologists in Capetown, Johannesburg and Durban, South Africa, followed by a three month tour of medical units in Nigeria and Liberia. In March, Dr. Guibor attended a Seminar in Medicine and Ophthalmology at the University of Vienna.

At the Chicago Round Table of the American College of Cardiology in March, Dr. Clayton J. Lundy presented a paper on "Long Term (9 months) Use of an Oral Diuretic, Chlorothiazide." Dr. Lundy is Chairman of the Board of Governors of the American College of Cardiology and the College's Governor for Illinois. At the January meeting of the College in Chicago, Dr. Benjamin M. Gasul presented a paper entitled "Interesting Pediatric Cases."

In late March, Dr. Gazul served as Co-Chairman of the Chicago Heart Association's World-Wide Symposium on "Pulmonary Circulation in Congenital Heart Disease," and he will serve as Co-Director of the forthcoming American College of Physicians Post-Graduate Course to be held at the University of Illinois School of Medicine.

Dr. Frederick J. Szymanski has been elected Secretary-Treasurer of the Chicago Dermatological Association.

Dr. Douglas A. MacFadyen attended The Biophysical Society meeting in Boston where he presented a paper on "The Geometry of Fat Cell Development." He also presented a paper on "Cellular Geometry" at the recent meeting of the Chicago Section of the American Chemical Society.

Dr. Edward C. Holmblad recently addressed the Michigan Industrial Medical Association in Grand Rapids. His subject: "Current Trends in Industrial Medicine." He later spoke before the Omaha Regional Meeting, President's Committee on Employment of the Physically Handicapped. Dr. Holmblad has been appointed Chairman of the Medical Advisory Committee to this Committee.

DINNER HONORS DR. JENKINSON

A Testimonial Dinner honoring Dr. Edward L. Jenkinson, Director of St. Luke's Department of Radiology and Retiring Chairman, Department of Radiology, Northwestern University Medical School, was held at the Drake Hotel. Attending this function were Radiologists from every part of the United States and twenty-five former Fellows of Radiology who received their training in Radiology under Dr. Jenkinson's direction.

A Foundation and Fellowship to further the study of Radiology will be established in Dr. Jenkinson's honor at the Northwestern Medical School.

The evening was a great tribute to Dr. Jenkinson's outstanding contribution to Radiology.

Drs. Barbara Spiro, Lawrence H. Lassiter, and Edward A. Pushkin attended the Chicago Ophthalmological Society's 10th Annual Clinical Conference in February at the Drake Hotel.

Dr. E. Lee Strohl travelled to Montreal in February to attend The Surgeons Travel Club meeting. In March, Dr. Strohl presented a paper entitled "Nasogastric Intubation: Indications, Complications, Safeguards, and Alternate Procedures" before the Southeastern Surgical Congress.

At the Annual Meeting of the Institute of Medicine of Chicago, Dr. Strohl was elected Treasurer. Dr. Strohl and Dr. James A. Campbell have been appointed to Mayor Daley's Scientific Advisory Committee to the Board of Directors of the Municipal Tuberculosis Sanitarium.

In March, Dr. Campbell spoke on "Research Frontiers in Medicine" before the Woman's Board of the First Presbyterian Church in Evanston.

Dr. A. Beaumont Johnson, II, recently attended the Interurban Neurosurgical Society meeting in Columbus, Ohio.

Early this year, Dr. Karl Scheribel attended a Seminar in Ophthalmology and Otolaryngology at the University of Florida.

At the Annual Meeting of the Chicago Society of Internal Medicine, Dr. Howard Wakefield was elected President. Dr. Wakefield has also been appointed a member of the Advisory Committee, Educational Standards for Occupational Therapy in the United States. He recently attended the Congress on Medical Education and Hospitals held in Chicago.

In February, Dr. Edward Allen spoke at the Ohio State University Medical School and the Columbus Gynecological Society's meeting on "Examination of the Adolescent Girl" and "Prolapse of the Uterus." He illustrated his lectures with colored movies.

Dr. Robert M. Kark gave the Donald Fischer Memorial Lecture at the Medico-Chirurgical Society meeting in Louisville, Kentucky, late in February. His topic: "Present Status of Bright's Disease." Dr. Kark recently returned from London, England, where he gave the Annual Harveian Lecture on the occasion of the centenary of the death of Richard Bright. The subject of his lecture was "Bright's Disease Then and Now." While abroad, Dr. Kark also lectured at four medical schools in England and Scotland.

Dr. Craig Butler has been appointed Chairman, National Scientific Program Committee, American Academy of Pediatrics. Dr. Butler recently attended Continuation Seminars in Pediatrics at the University of Kansas, and in May will attend the American Academy of Pediatrics, Spring Sessions, in New York City.

Dr. John T. Reynolds was re-elected Secretary of the Western Surgical Association and Dr. Burton C. Kilbourne was elected to membership in this Association.

In January, Dr. Reynolds attended the Cardiovascular Surgeons Club meeting in Ann Arbor and in February went to Boston for the meeting of the Society of University Surgeons.

At the 53rd Annual Meeting of the American Urological Association in New Orleans the latter part of April, Dr. William J. Baker, President of the Association, delivered the President's Address. His subject: "Office Urology."

Dr. Norris J. Heckel attended this meeting and subsequently attended the meeting of the American Association of Genito-Urinary Surgeons in Edgewater Park, Mississippi. Dr. Heckel has been elected President of the Clinical Society of Genito-Urinary Surgeons. Also he is Chairman, Board of Trustees of the Mississippi Valley Medical Society, from which he received their 1957 Distinguished Service Award.

AWARD ESTABLISHED IN DR. COLEMAN'S HONOR

At the Annual Meeting of the Institute of Medicine of Chicago, an anonymous donor contributed toward an annual prize to be given for "outstanding service in medicine and allied sciences in Chicago." The prize is to be known as the George H. Coleman Award and will be in the form of a medal.

The purpose of establishing this award is to honor Dr. Coleman for his meritorious service to all things worthwhile in medicine in Chicago. For the thirty-fourth consecutive year, Dr. Coleman was elected Secretary of the Institute.

Associated with St. Luke's since 1925, Dr. Coleman is Past-President, Chicago Society of Internal Medicine; Past-Secretary, National Physicians' Committee; and Past-Secretary, Chicago Society for Medical History. He is currently Vice-President of the Board of Directors of the Illinois Medical Service (Blue Shield).

Dr. Warren H. Cole has been made an Honorary Member of the Los Angeles Surgical Society. Dr. Cole is President-Elect of the American Geriatrics Society and the American Goiter Association.

Late in January, Dr. Harry F. Dowling attended a meeting of the Committee on Scope, United States Pharmacopeia, in New York City. From New York, Dr. Dowling went to Washington where he gave a talk on "Carriers of Antibiotic Resistant Staphylococci" at the meeting of the Subcommittee on Trauma of the National Academy of Sciences, National Research Council.

Dr. Samuel G. Taylor, III, presented a talk before the Louisiana Division of the American Cancer Society in New Orleans entitled "Cortical Steroids in the Treatment of Disseminated Breast Cancer." While in New Orleans, Dr. Taylor also attended the Endocrine Study Panel of the National Chemotherapy Cancer Service Center of the National Institutes of Health, Welfare and Education.

Dr. Taylor has been appointed a member of the Committee on Professional Education, American Cancer Society. He is also Chairman of the American College of Physician's Committee on Cancer to which Dr. Frank P. Hendrickson has been appointed the American College of Radiology's Representative.

In March, Dr. Hendrickson attended the Radium Society meeting held in Hollywood, Florida.

"Treatment of Pancreatitis and Its Complications" and "Surgery of the Common Bile Duct" were the subjects of papers Dr. Charles B. Puestow presented before the Mid-South Post-Graduate Medical Assembly in Memphis in February. In

March, Dr. Puestow, President of the Chicago Surgical Society, attended the New Orleans Surgical Society meeting.

Dr. Louis W. Schultz recently attended meetings of the American Society of Maxillofacial Surgeons in Minneapolis and American Society of Oral Surgeons in Florida where he presented papers on "Nasal Splints" and "Twenty-One Years of Experience with Hypermobility of the Temporomandibular Joint," respectively. Dr. Schultz is President of the Chicago Society of Oral Surgeons.

"Male Infertility" was the subject of Dr. James H. McDonald's paper presented before the Milwaukee Urological Society. In January, Dr. McDonald gave a paper, "Dermal Ureterostomy," before the Chicago Urological Society's meeting. Dr. Edwin C. Graf participated in a panel discussion at a meeting of this Society's Urinary Division.

Dr. Graf recently presented a paper, "Common Injuries of the Lower Urinary Tract," before the Iowa State Medical Society.

Drs. Robert J. Jensik, Foster L. McMillan, Clarence W. Monroe and Frederic A. dePeyster attended the Central Surgical Association's Annual Meeting in Columbus, Ohio, in February.

Dr. Jensik was in Washington, D.C., in late January to attend the Adjuvant Chemotherapy Program, National Institute of Health.

In February, Dr. Helen C. Hayden attended the meeting of the American Academy of Allergy in Philadelphia.

As a membership thesis, Dr. Robert E. Lane presented a paper before the Chicago Gynecological Society in January. His subject: "Endometriosis of the Vermiform Appendix."

Dr. Harry E. Mock, Jr., who has been elected to the Board of Governors, Chicago Society of Industrial Medicine and Surgery, recently presented a paper entitled "Fractures of the Hand" before the Section on Osseous Trauma at the Post-Graduate Conference of the Chicago Medical Society. Dr. Robert D. Ray recently gave a paper before the Society's North Suburban Branch. His subject: "Orthopedic Management of Cerebral Palsy."

In early February, Dr. Ray attended the American Academy of Orthopedic Surgery meeting in New York City. Dr. Ray is President-Elect of the Orthopedic Research Society.

In January, Dr. Roland P. Mackay, who is President of the American League Against Epilepsy, presented a paper entitled "Fundamental Aspects of the Convulsive Disorders" at the Galesburg (Illinois) State Hospital. Dr. Mackay has been re-elected Chairman, Chicago Chapter, National Foundation for Infantile Paralysis.

DR. McMILLAN HEADS ST. LUKE'S STAFF

At their Annual Meeting members of the St. Luke's Medical Staff re-elected Dr. Foster L. McMillan as President. Dr. McMillan, Attending Surgeon at St. Luke's and Associate Clinical Professor of Surgery at the University of Illinois School of Medicine, has been associated with the hospital since 1929.

Other officers elected to St. Luke's Staff are: Dr. Eric Oldberg, Vice President; Dr. Walter F. Hoeppner, Secretary; Dr. Willis G. Diefenbaugh, Treasurer.

Dr. Alfred P. Solomon was Guest Speaker at the recent meeting of Safety Engineers. His subject: "Accident Proneness." Dr. Solomon will go to San Francisco in May to attend the American Psychoanalytic Association and American Psychiatric Association meetings.

Dr. John W. Curtin has been appointed Chairman of the Local Arrangement Committee for the 27th Annual Meeting of the American Society of Plastic and Reconstructive Surgery.

Dr. Charles V. Heck, who is Treasurer of the Chicago Orthopedic Society, presented a paper entitled "Injuries of the Cervical Spine" before the American Association of Railway Surgeons at the Drake Hotel in April.

In February, Dr. Oglesby Paul spoke on "Myocardial Infarction" at the Post-Graduate Course in Cardiovascular Disease held at the University of Kansas Medical School. In March, Dr. Paul spoke for the Illinois and Chicago Heart Associations in Peoria. His topic: "Treatment of Coronary Heart Disease."

IN MEMORIAM

Dr. Elven J. Berkheiser, Chairman of the Department of Orthopedic Surgery and Attending Orthopedic Surgeon at Presbyterian, who had been associated with the hospital since 1920.

Dr. Henry Bascom Thomas, Senior Attending Orthopedic Surgeon until his retirement, and in recent years a member of the Emeritus Staff at St. Luke's.

Dr. John R. Norcross, Attending Orthopedic Surgeon at St. Luke's, who had been associated with the hospital since 1936.

Dr. Francis E. Seneary, Consulting Dermatologist at Presbyterian since 1943.

Mrs. Charles H. Morse, a member of the St. Luke's Woman's Board since 1922.

Mrs. James Boyd, a member of the Presbyterian Woman's Board since 1933.

RUSH TRUSTEES GIVE FUNDS

Dr. Ernest E. Irons, President, and the other members of the Board of Trustees of Rush Medical College, passed an official resolution at their annual meeting to the effect that income from Rush Medical College general endowment funds and specific endowment funds be made available to the hospital to be used under the direction of the Research and Education Executive Committee.

In accordance with the recommendations of the Rush Trustees, a major portion of these funds is being assigned for use in establishing specific Fellowships in the following Departments: Medicine, Surgery, Ophthalmology, Otolaryngology, Dermatology, and Pathology.

The hospital appreciates this generosity and in these times, when the cost of all things continues to increase, the financial support of the Rush Trustees in the vital research and education program of the hospital is particularly gratifying.

DR. KLICKA ELECTED TO HEAD CHC

At the Annual Meeting of the Chicago Hospital Council, Dr. Karl S. Klicka, Director of Presbyterian-St. Luke's, was named President-elect of the Council. He will assume office in 1959.

In March, Dr. Klicka attended the Ohio Hospital Association's Annual Meeting, where he spoke on "Hospital Care in 1965."

OB-GYNE STAFF CONTRIBUTES

Members of St. Luke's Obstetrical-Gynecological Department have recently turned over a substantial contribution to the Building Fund from their OB-Gyne Fund.

According to Dr. George C. Finola, Chairman of the Department, the OB-Gyne Fund is supported by contributions from grateful patients and by funds from physicians' insurance benefits.

The hospital is very grateful for this generous support from St. Luke's OB-Gyne Staff.

DOCTORS' WIVES GIVE FUNDS

Mrs. Egbert Fell, President, and the other members of Presbyterian's Doctors' Wives group, have given a generous contribution to the proposed Virology Laboratory to be located in the new Medical Science Research Building.

It is this kind of initial support which is so essential in building further support for the development of vital basic research areas such as this Laboratory.

ST. LUKE'S REHEARSES DISASTER

Approximately one hundred doctors, nurses and hospital personnel participated in a recent Disaster Plan rehearsal at St. Luke's.

Seventy students from Northwestern University's School of Hospital Administration were on hand to be briefed on hospital disaster planning and to observe the rehearsal.

The most realistic rehearsal to date, participants worked by lanterns in the Morton Clinic, caring for fifty "casualties" from a "tornado." The Disaster Plan used in the event of power interruption was put into effect.

"Casualties" (portrayed by student nurses and some of the guests from Northwestern) were admitted to the Clinic lobby where a team of doctors and nurses examined them and rendered "emergency life saving treatment" when necessary. Doctors then evaluated and recorded the "seriousness of injury" on casualty identification tags (attached to "casualty's" clothing or wrist) and indicated appropriate area to which they should be taken.

Upper floors of the Clinic and adjacent hospital floors were turned into operating room areas and treatment areas for shock, fractures, burns and other injuries. "Casualties," some literally borne on stretchers, came to the appropriate areas where teams of doctors and nurses rendered further "treatment." At the conclusion of the rehearsal, all participants joined in a discussion of the problems encountered and of how to overcome them.

DEPARTMENT HEADS APPOINTED

Dr. Karl S. Klicka has announced the following new appointments to Presbyterian-St. Luke's departmental leadership:

Mr. John B. King, Director of Personnel Relations. Mr. King has twenty years of industrial experience as Personnel Director and Management Consultant, and has served on the Faculty of the Department of Business, Northwestern University, since 1945.

Mr. Donald Scalzo, Director of Purchases. Previously, Mr. Scalzo had served three years as Purchasing Agent for Grant Hospital.

Mrs. Maud E. Parkes, Director of Housekeeping. Mrs. Parkes comes to Presbyterian-St. Luke's from the Veterans Administration Center in Los Angeles where she was Chief of Housekeeping Division.

Mr. Carl Lorch, Director of the Laundry. Mr. Lorch has managed commercial laundries in St. Petersburg and Ft. Myers, Fla.

Mrs. Nan Page, Director of Volunteers. This appointment was made after the resignation of Mrs. Fentress Ott, who was Chairman of Volunteers at St. Luke's. Mrs. Page has been Director of Volunteers at Presbyterian since 1955.

SILVER JUBILEE TO BE CELEBRATED

In March, 1933, a small group of St. Luke's doctors' wives met for tea at the home of

Mrs. James A. Gough to discuss the possible organization of an Auxiliary to the Medical Board. This meeting resulted in a formal tea at the hospital in April for which invitations were sent by Mrs. Gough and Mrs. Eugene A. Edwards to all wives of staff members. Sixty women attended and expressed interest in an Auxiliary. It would have a two-fold purpose: to supplement the work of the other hospital organizations with definite focus on the needs of the Medical Board, and to promote a friendly cooperation among the doctors' families.

Thirty-eight women became charter members of the new group and on May 12, 1933, the first meeting of the St. Luke's Women's Auxiliary to the Medical Board was held. Now totalling one hundred and thirteen doctors' wives, the Auxiliary will celebrate its "Silver Jubilee" at its Fifth Annual "Fun for Funds" Dinner Dance in May.

The hospital is extremely grateful for the small tea party back in March, 1933, and fortunate to have had the generous support of the Women's Auxiliary these past twenty-five years.

DAD'S DAY AT SCHOOL

Some one hundred and twenty-five fathers of freshman student nurses were "Kings for a Day" at the Presbyterian-St. Luke's School of Nursing on February 22. This Annual Father's Day, first observed at the St. Luke's School in 1955, acquaints fathers with the academic, professional and social life of a student nurse. This year's fathers came from Minnesota, Ohio, Iowa, Indiana, Michigan, Wisconsin and Illinois.

The day's schedule (run simultaneously at the Presbyterian and the St. Luke's units) included morning classes in nursing, science, psychology, social science and communication. At noon, all the guests were entertained at luncheon in the Presbyterian nurses' residence. Representatives of hospital Administration, Woman's Boards, Medical Staffs and the Faculty attended the luncheon.

After luncheon, Miss Edith D. Payne, Director of the Nursing Department, described the new "Two Year Plus Nurse-Internship" plan now offered at the School, and Dr. Karl S. Klicka presented slides of the hospital's ultimate long-range plan. The day's activities concluded with selections by the freshman nurses' chorus.

THE COVER

Looking northwest from the corner of Harrison and Paulina Streets toward the thirteen story East Pavilion now nearing completion.

THE SIGNIFICANT DECISION—

Two years ago the decision for merger was achieved—a daring step demanding vision and courage for immediate action, and faith for the long view.

The short intervening months have been spent in working, thinking and planning—new lifelines to the future. The first concrete evidences of the cooperative efforts of many are now immediately before us . . .

THE FUTURE BEGINS

From the old, looking into the new. The east-west corridor of the newly opened second floor patient unit as seen upon entering the "breakthrough" from the old Pavilion. Blue-green tile lining the corridor walls and soft yellow tile decorating the nursing station create a feeling of warmth and cheerfulness.

On July 2, the first patient was admitted to the second floor of the East Pavilion, overlooking Congress Expressway, and with the opening of this first patient unit in the new thirteen story building the future of Presbyterian-St. Luke's Hospital begins. Additional floors are scheduled to open in the near future (see page 8 for Planning and Building Timetable) and thus the first stage of the ultimate plan for the hospital will become a reality.

A unit for surgical patients, the newly opened floor is equipped with the most modern facilities for the best possible patient care. Patient rooms, located around the periphery of the T-shaped structure (see plan on page 6), surround a central area which includes the nursing station and ancillary services essential to the care of the patient.

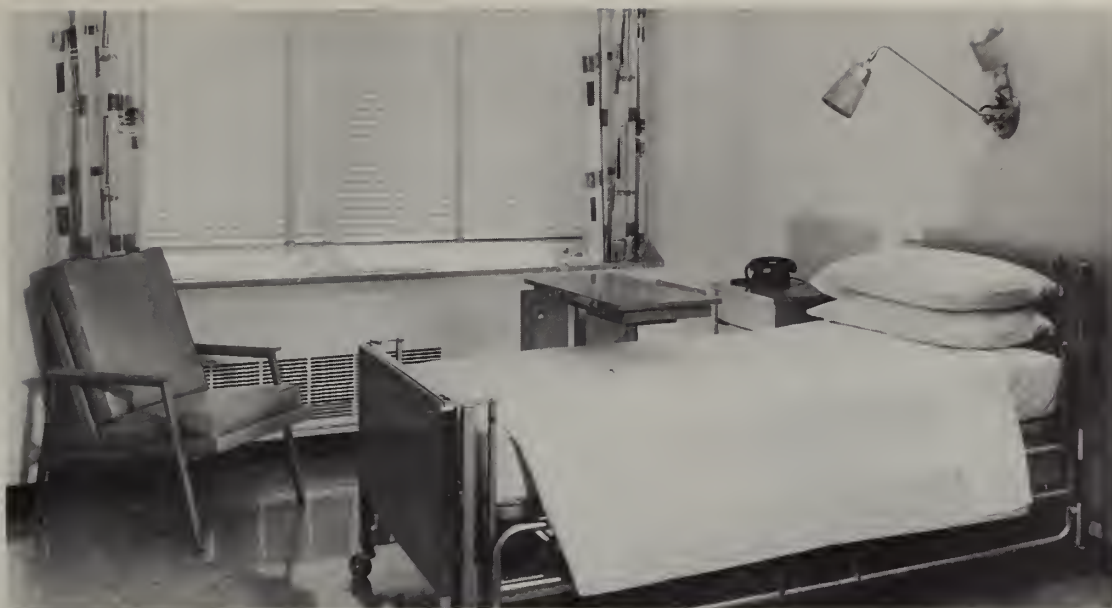

With a total bed capacity of thirty-five, the new unit has twenty-four private rooms, each equipped with a lavatory and built-in wash-basin-dresser unit; five private deluxe rooms with bath; one semi-private room and one four-bed ward, both with lavatory and built-in wash-basin-dresser unit.

Electrically operated beds enable the patient to raise or lower the entire bed, or head and foot of the bed, as desired. On the wall above every bed is a two-way intercommunication system through which the patient can talk to the nursing station, and an oxygen outlet, eliminating the use of oxygen tanks at the bedside. A thermostat in every room permits individual control of the air conditioning and heating system. An added feature in all private rooms will be a television unit which can be controlled remotely from the patient's bed.

(Continued on page 5)

Nursing Station—nerve center of the new patient unit—provides ample working space. Rotating chart rack facilitates handling of charts and is easily accessible to Doctors' chart and reference area beyond partition to the right.

Patient room, decorated in soft pastel colors, provides a homelike atmosphere for the patient. Electrically operated bed permits patient to raise and lower entire bed, or head and foot of bed, as desired. All beds are equipped with side rails.

Compact wash-basin-dresser unit in each room allows sufficient space for patient's belongings.

Patient receives instructions from student nurse on the operation of electric bed. (Patient in this picture and one on following page is portrayed by Hospital Volunteer.)

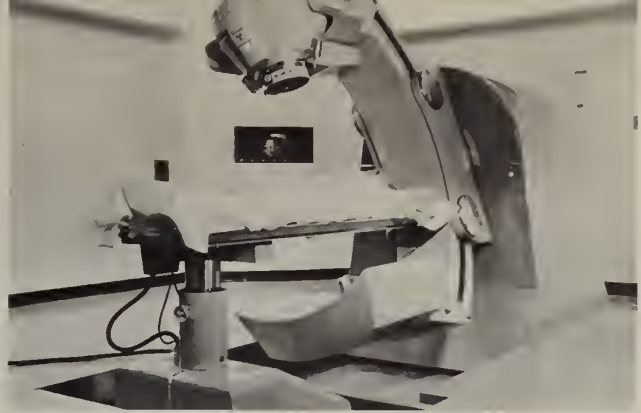

Two-way intercommunication system on wall above bed permits patient to talk with Nursing Unit Clerk at Nursing Station (below) located in the north portion of the central area. In addition, calls from patients also can be answered by nurse using wall panel at the south end of the central area (left).

(Continued from page 1)

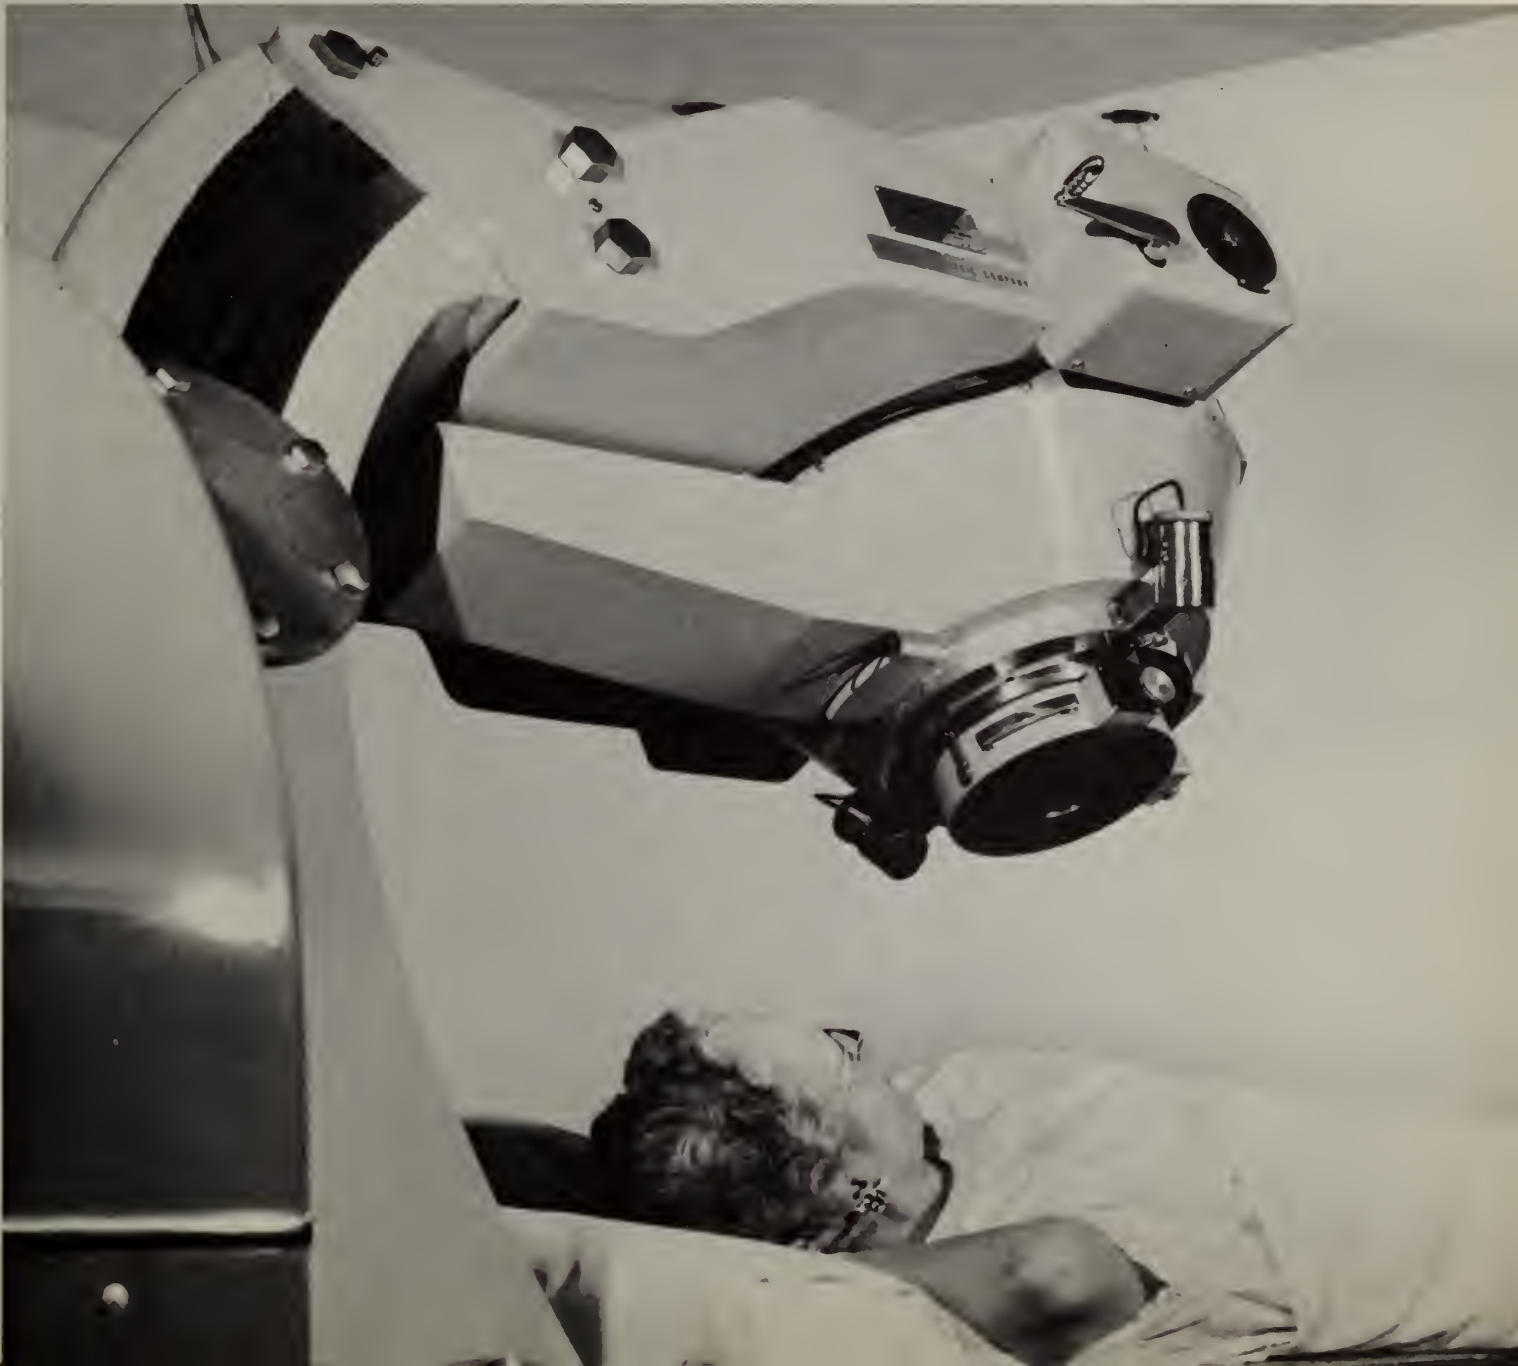

In addition to the opening of the first patient unit, the X-ray Therapy Department in the southwest area of the new building also is in operation. Included in this department are two concrete reinforced Cobalt Rooms, one of which is already equipped with a Rotation Therapy Machine (see below) energized with Cobalt, a radioactive substance.

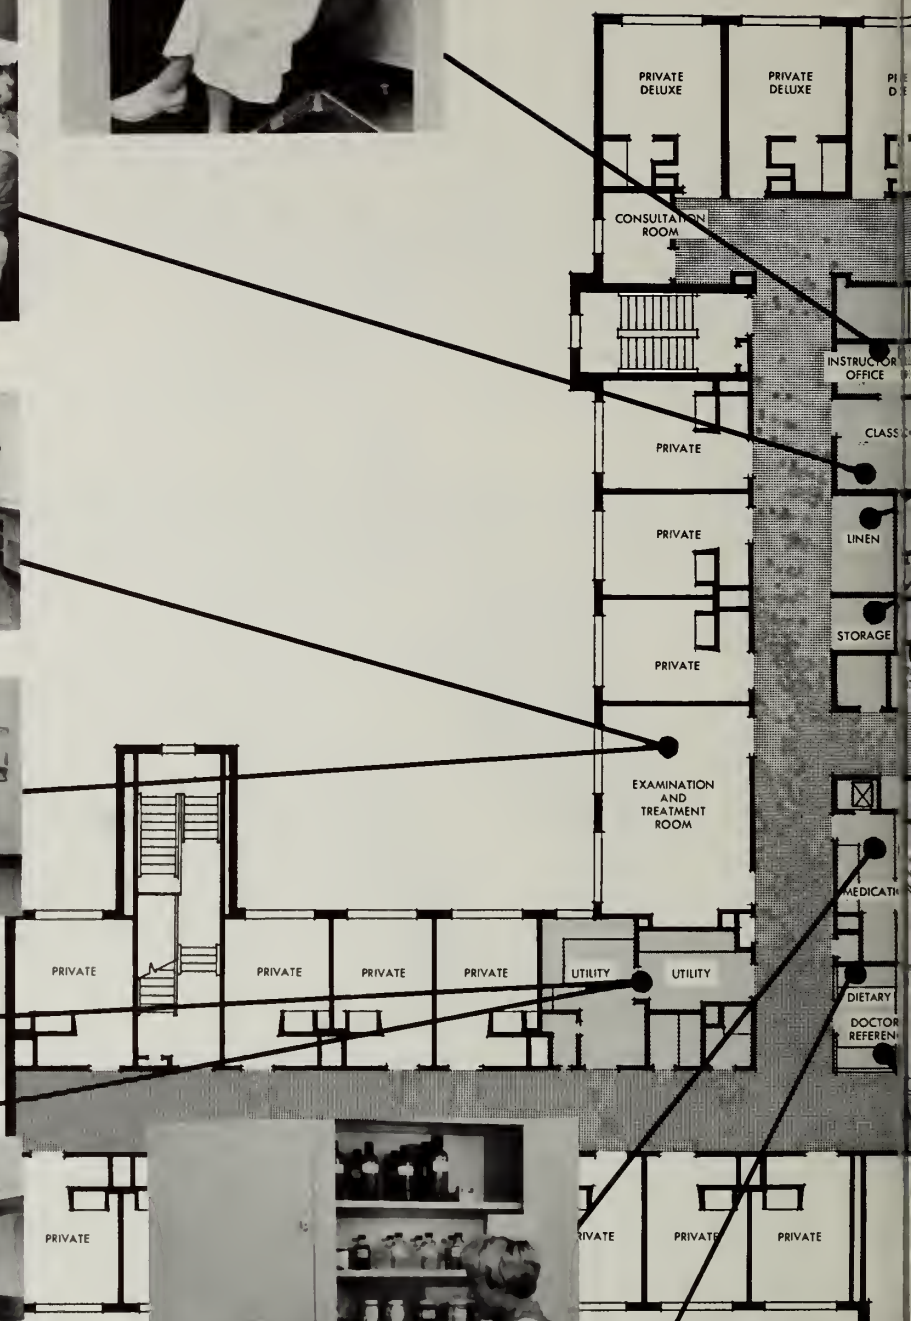

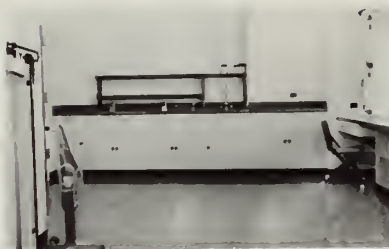

This marks only the beginning of the future for Presbyterian-St. Luke's Hospital, but the opening of these two areas in the East Pavilion manifests the daring and farsighted philosophy of the hospital's Board of Trustees, Medical Staffs, and Administration—to "Make No Little Plans."

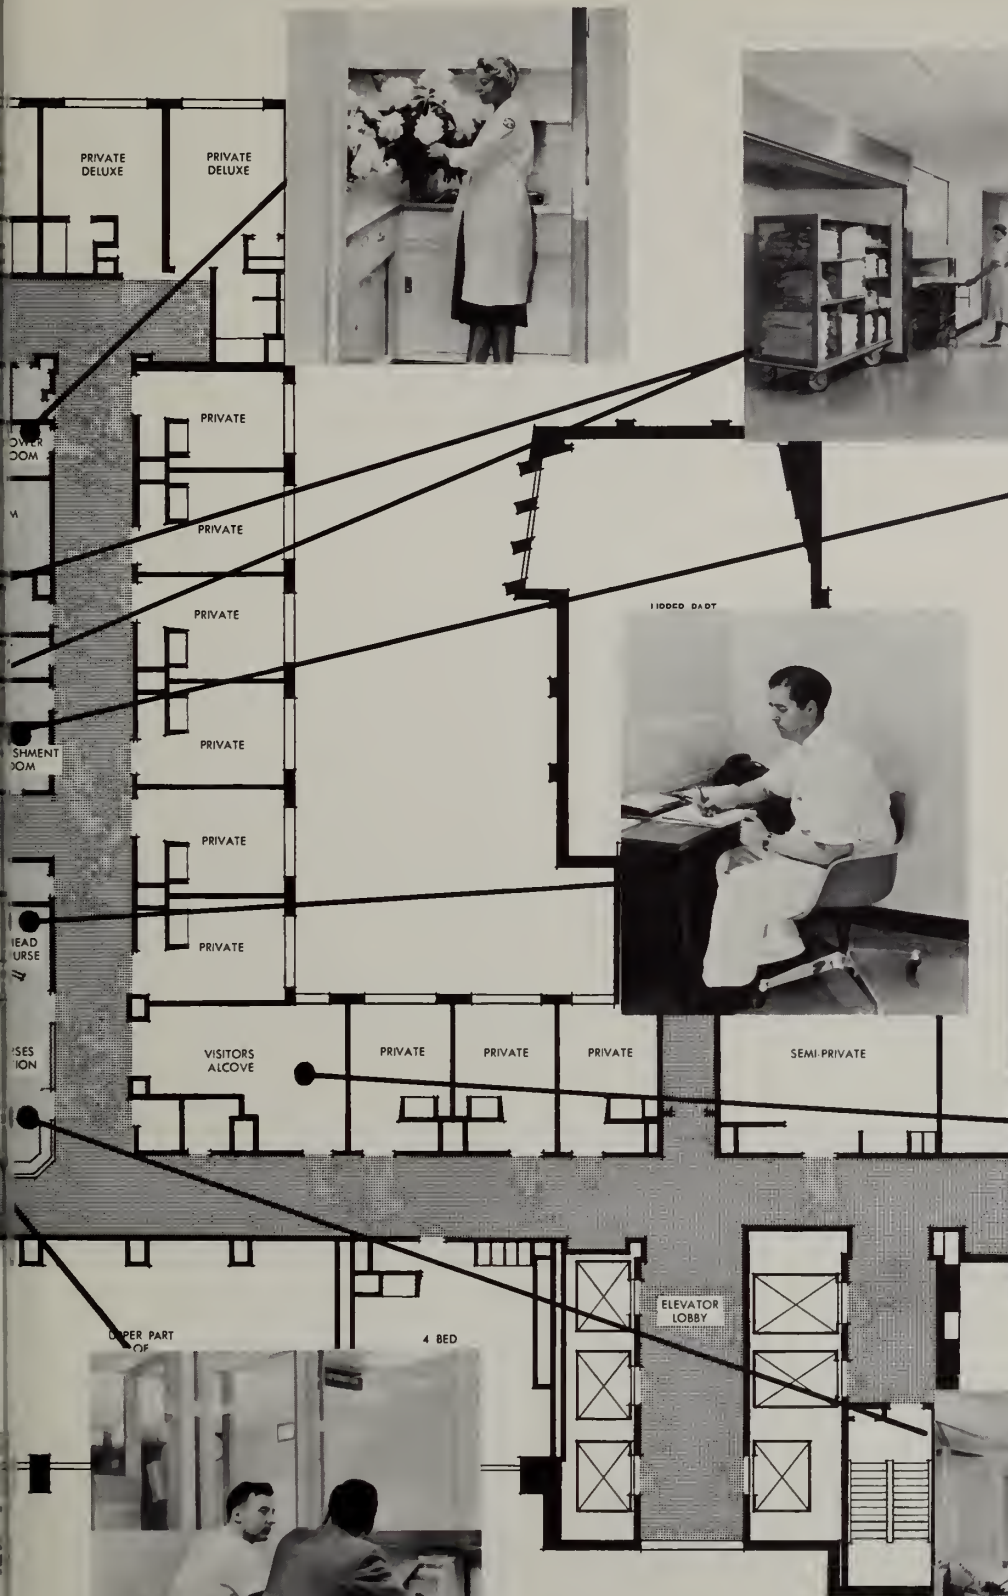

Rotation Therapy Machine energized with Cobalt is now in use in the newly opened X-ray Therapy Department. Nurse, visible through thick glass window in background, watches patient and operates machine from control panel outside of room.

(Patient in these pictures portrayed by Hospital Volunteer.)

MODERN FACILITIES FOR THE BEST POSSIBLE PATIENT CARE

PLANNING AND BUILDING TIMETABLE

Sections of the new East Pavilion have been opened and others are to be completed in the months ahead. Planning continues on other aspects of the program.

We want everyone interested in the hospital to know the major steps in our planning. However, we cannot always be definite at a specific moment due to the complications of present building schedules, the availability of funds and the time required for all interested groups to participate in planning and decision making.

Notwithstanding these immediate deterrants, the situation as we go to press in all aspects of the work is as follows:

1. Negotiations continue for obtaining the funds to proceed with the Medical Science Research Building.

2. The general contract for the building of the \$300,000 Robert R. McCormick addition to the School of Nursing was let July 1st. This will make available fifty-six additional rooms for nursing students. Its completion date will be about May of 1959.

3. The construction of the new kitchen and cafeteria is continuing at a rapid pace on the ground and first floor levels of the present hospital. All of the principle structural work has been completed. Mechanical equipment and interior work is well underway. It is hoped that this facility will be in use in late 1958.

4. The construction of the new heating tunnel to serve the hospital is described elsewhere in this issue, and is scheduled for completion in late 1958.

5. The opening of the ground floor and main floor as well as the second and the third floor patient areas took place on or before August 1st.

6. The planning for the Medical Science Research Building is moving rapidly. Test borings on the site immediately to the south of the new east pavilion have been completed. The arrangement of space on individual floors is under final review. It is hoped that construction can be started by September 1st and completion of the structure can be scheduled for December 1959.

7. Studies for the rehabilitation of certain essential areas of the older buildings are going forward to coincide with moves in the east pavilion and the Medical Science Research Building. Such remodeling is being kept to a minimum yet it is essential to the proper hospital operation.

8. The working drawings for the new 200 unit Employees Apartment Building have been completed and the initiation of the actual work awaits the review of a study of the economics of this type of building in the Medical Center and the subsequent development of the financing. No completion date for this structure has yet been established.

9. Some preliminary studies of the Doctors Office Building have been going forward. A number of similar facilities in other cities have been visited. This is a prelude to the detailed planning to be undertaken later after the structures with higher priority have made sufficient progress.

10. St. Luke's Hospital continues in full operation. The ultimate use and disposition of the properties are being studied and specific proposals are now being scrutinized. These are being coordinated with the other building developments and the objective of physical merger in early 1960.

All existing memorials in the St. Luke's Hospital buildings are being carefully compiled. Continuing recognition of these past gifts will be made in the new facilities by means now under study by the Board of Trustees.

PLANNING RESPONSIBILITY

The planning of this large and comprehensive medical facility demands the attention and judgment of many persons with talents in varying fields.

The Board of Trustees plays a major part in this regard and shoulders the responsibility of providing the community with the best medical facilities possible.

The hospital administrative staff as well as members of the medical staff are important basic contributors to this planning activity. Without their thoughtful participation, the proper physical requirements would be most difficult to develop.

The coordination of these planning elements is the responsibility of the professional land and building planners, and the firm of Skidmore, Owings and Merrill —Architects-Engineers are serving the hospital in this important capacity. The long-range master plan has been developed with their leadership and all plans for our immediate and future building needs will be carried forward in relationship to it.

EXPANSION OF HEATING FACILITIES

Construction work was initiated April 15, 1958, on the reinforced concrete tunnel to carry steam from the Medical Center Steam Company plant located at the southeast corner of Hermitage and Taylor Streets to the hospital.

This work is the first step in a new plan for the hospital's ultimate use of the Medical Center Commission's steam generating plant for all of its needs permitting the abandonment of operation of a plant by the hospital itself.

The decision to use the centralized facility is the result of an exhaustive study undertaken to determine long-range needs and to evaluate the operating and economic advantages of either expanding the present plant or purchasing steam from the Medical Center Steam Company. Evaluation of the study by the Board of Trustees and the administration indicated significant advantages in the use of centralized generating facilities.

The Medical Center Steam Company is a subsidiary of the Commonwealth Edison Company and is operated by the University of Illinois who subcontracts to other users as well as supplying their own buildings.

The purchased steam is transmitted to the hospital through ten inch diameter high pressure steam lines placed in an underground tunnel. The new tunnel now being built is a continuation of the present system in use for service to University of Illinois buildings. Construction starts 175 feet south of Polk Street on Wood Street adjacent to the University of Illinois Pharmacy Building. It proceeds to the corner of Polk and Hermitage Streets, and then north under the west sidewalk of Hermitage to the north side of Harrison Street adjacent to the present boiler room. Total length of the tunnel is 1,050 feet. Suitable connections to serve the School of Nursing and Kidston House are being provided. Each tunnel section provides shafts for personnel access for maintenance, as well as air intake and exhaust. Cost of the tunnel and piping is \$400,000.

Initially the new steam lines will carry 20,000 lbs. of steam per hour augmenting the 50,000 lbs. production of the hospital's present boilers to satisfy the needs for the 1958-59 heating season. The Medical Center Steam Company has initiated a program to add additional boiler capacity to satisfy the total Presbyterian-St. Luke's needs for the immediate and long-range future.

At the time these boilers are put into operation, demolition of the existing hospital boiler plant will be possible. This site is critically needed for further expansion of the hospital's building program.

The general construction work for the concrete tunnel is under contract with Pietro Scalzitti Company, the steam fitting and plumbing with M. J. Corboy Corporation and the electrical work with Goldberg and O'Brien.

Looking down Hermitage Street where construction is in process on steam tunnel leading to Medical Center Steam Company plant (smokestacks in background).

MEDICAL STAFF BYLAWS

The final revisions of the medical staff bylaws of the Presbyterian-St. Luke's Hospital have been completed, and have been unanimously approved by the staffs. They specify the procedure by which members are selected, the organization of the staff, and its duties and responsibilities in terms of scope and regulations, assuring the smooth-running of the institution. The establishment of the bylaws represents an important step in the organization of the new hospital.

There are multiple functions of the Presbyterian-St. Luke's Hospital. The most important is the care of patients. Others are the responsibility for the training of interns and residents, the teaching of undergraduate students and the development of a broad research program. A requirement of staff membership is the requisite that a substantial portion of time shall be given to nonremunerative service in teaching, research, administrative work or public service.

Appointments to the staff are subject to the agreement between the hospital and the University of Illinois. All members of the staff must be on the faculty of the University of Illinois College of Medicine and their appointments to the staff must be approved by their individual department chairman, the Executive Committee, the staff and the Board of Trustees of the hospital. Annual renewal of appointments is required below the rank of attending physician. On reaching full attending rank, service continues at the pleasure of the Board of Trustees. At the age of sixty-eight years, members of the staff become eligible for consulting rank, retaining their professional privileges.

The hospital staff consists of the four Divisions of Medicine, Surgery, Laboratory and Radiology. Each of these includes the departments whose activities classically fall within these respective divisions. The Chairmen of the Departments of Medicine and Surgery are also Chairmen of the Divisions of Medicine and Surgery. They are responsible to the Executive Committee of the staff for all matters within their respective divisions, and they have the assistance of a committee in the formulation and execution of policies and the assignment of hospital beds within their divisions.

Department chairmen are carefully selected through search committees appointed by the President of the staff, and when approved by the Executive Committee, staff and Board of Trustees, they are appointed for a term of five years. At the end of five years the appointment of salaried chairmen is subject to renewal in the same manner, and if they are reappointed they are continued in their chairmanship until their sixtieth

birthday, after which they may be reappointed for another five-year period in special cases. Nonsalaried chairmen are appointed by the same procedure for five-year periods up to their sixtieth birthday. This procedure will encourage acceptance of these appointments by candidates qualified to organize and supervise their departments.

To assure the selection of qualified individuals for the staff offices of President, Vice President and Secretary-Treasurer, nominations are made by a committee which is active throughout the year.

The President is the chief executive officer of the staff, with power to appoint all standing committees and their chairmen. He represents the staff in its relationship with the hospital administration, and acts as liaison officer between the staff and the Board of Trustees.

The Executive Committee comprises the staff representation to the Joint Conference Committee with representatives of the hospital administration and the Board of Trustees. This committee is a coordinating body for the overall planning of the institution. The Executive Committee is the most important committee of the staff. Its membership includes the staff officers, the chairmen of clinical departments and three members elected annually by the staff, as well as the Dean of the College of Medicine and the Director of the hospital, ex officio. This committee is charged with the continual review of the work of the hospital against established standards; reviews the work of all other committees of the hospital and receives appeals from any department or individual of the staff. The work of the Executive Committee in turn is subject to the approval of the entire staff.

Another important committee of unusual authority is the Research and Education Committee. It includes all department chairmen, three staff members selected by the President, members of the hospital administration, the Dean of the College of Medicine, representatives of the Board of Trustees of Rush Medical College, representatives of the Medical Committee of the Board of Trustees of the hospital, as well as medical staff representatives of donors of large research funds. This committee evaluates the significance of the research work being done.

The bylaws provide democratic checks and balances; the protection of individual members of the staff with the right of appeal for any abridgment of privileges; and the necessary review of the activities of the staff committees and departments.

MEDICAL STAFF ACTIVITIES

Dr. Gerald Owen McDonald will be a guest lecturer at a Symposium on Recent Advances in Surgery to be held in Houston, Texas, late in September. The title of his lecture: "Chemotherapeutic Adjuvants in Cancer Surgery."

Drs. John W. Clark and Theodore B. Schwartz attended the June meeting of the National Society of Nuclear Medicine in Los Angeles where Dr. Schwartz presented a paper on "Simultaneous Measurement of Body Water Compartments."

While on the west coast, Dr. Schwartz also attended meetings of the American Goiter Association and American Diabetes Association.

Dr. Clarence W. Monroe has recently been elected to Membership in the American Association of Plastic Surgeons.

L' Association Francaise de Chirurgie has invited Dr. Stanley E. Lawton to appear as a guest on the program at their annual meeting in Paris this year. Dr. Lawton will participate in a discussion of the "Treatment of Pseudo-cysts of the Pancreas."

ELECTIONS TO OFFICES

Many Members of the Presbyterian-St. Luke's Medical Staffs hold offices in and serve on committees of national, state and local professional organizations. Following are recent elections which have come to the attention of the Editors:

Dr. Edwin F. Hirsch, President, Chicago Medical Society.

Dr. Kenneth C. Johnston, President, North Shore Branch, Chicago Medical Society.

Dr. Francis H. Straus, President, Chicago Surgical Society.

Dr. E. Lee Strohl, Vice President, Chicago Surgical Society.

Dr. Frank E. Trobaugh, Jr., Secretary-Treasurer, The Illinois Association of Blood Banks.

Dr. Noel G. Shaw, President, Chicago Pediatric Society, and Member, Executive Committee for the Clinical Conference of the Chicago Medical Society for the next four years.

Dr. Clayton J. Lundy, Chairman, Board of Governors, American College of Cardiology.

Dr. Helen C. Hayden, First Vice President, American College of Allergists.

Dr. Howard Wakefield, Regent, American College of Physicians, and Member, Executive Committee, Chicago Society of Internal Medicine.

Dr. Ladislav J. Meduna, President, American Society of Medical Psychiatry.

Dr. Warren H. Cole, President, American Goiter Association and President, American Geriatrics Society.

Dr. James W. Merricks, re-elected Secretary-Treasurer, Rush Medical College Alumni Association.

Dr. Frank E. Trobaugh, Jr., has been elected to Fellowship in the American College of Physicians, as well as to Memberships in the Chicago Society of Internal Medicine and the Institute of Medicine of Chicago.

Dr. Trobaugh has submitted a paper for consideration to the International Congress of Hematology to be presented by him at their meeting in Rome in September.

In September, Dr. William F. Hughes will go to Brussels, Belgium, for the International Congress of Ophthalmology. Dr. Hughes has been re-appointed Program Chairman for 1959 of the American Ophthalmological Society.

Dr. Howard M. Sheaff will be in Copenhagen, Denmark, the latter part of August to attend the World Medical Association meeting.

In mid-June, Drs. Eric Oldberg and Roland P. Mackay attended the American Neurological Association meeting in Atlantic City. While in Atlantic City, Dr. Mackay also attended the Executive Committee meeting of the National Multiple Sclerosis Society.

Dr. Louis W. Schultz was Chairman of the local arrangements committee for the American Society of Oral Surgeons meeting which was held in Chicago the end of July.

At the American Dermatological Association Annual Meeting in Sun Valley in June, Dr. Clark W. Finnerud delivered the Presidential Address. His subject: "Dermatology's Debt to Dermato-Histopathology."

Dr. Finnerud has been elected American Dermatological Association Representative to the 1962 International Dermatological Congress to be held in Washington, D.C.

Dr. Robert A. Beebe has been appointed Program Chairman for the Third Illinois Congress on Maternal and Infant Care to be held in Springfield in January of 1959.

In June, Dr. Paul W. Searles attended the meeting of the American College of Anesthesia in Chicago. Dr. Searles is Secretary of the College and one of its Examiners. Written examinations for membership in the College were held at St. Luke's in early August.

Dr. Joseph E. Remlinger attended the meeting of the American Society of Anesthesiology in San Francisco in June. He is Secretary of this Society.

DR. STUPPY AGAIN HEADS STAFF

At their Annual Meeting on June 6, Members of Presbyterian's Medical Staff re-elected Dr. George W. Stuppy as their President. An Attending Physician, Dr. Stuppy has been associated with the hospital since 1935, and has served on the Faculty of the University of Illinois College of Medicine since 1940.

Dr. Bertram G. Nelson was elected Vice President of the Staff, and Dr. Frederic A. de Peyster was re-elected Secretary-Treasurer.

In June, Dr. Samuel G. Taylor, III, attended meetings of the American Cancer Society Executive Council in Denver, and the Joint Committee on Ablative Procedures in Breast Cancer of the American College of Physicians and American College of Surgeons in Chicago.

The American College of Surgeons, Georgia Chapter, meeting in Sea Island in September will hear Dr. R. Kennedy Gilchrist talk on "Surgery of the Colon."

Drs. William J. Baker and Warren H. Cole were in Stockholm, Sweden, early in July to attend the Regional Meeting of the American College of Surgeons. Dr. Cole gave a paper

at this meeting on "Dissemination of Cancer Cells in Surgery of the Gastro-intestinal Tract."

While in Stockholm, Dr. Baker also attended the International Urological Society meeting, and Dr. Cole went on to London where he attended the Seventh International Cancer Congress and where he received an Honorary Fellowship in the Royal College of Surgeons.

Dr. Daniel H. Callahan has been nominated to Membership in the American College of Surgeons and in the American Urological Association.

DR. IRONS RECEIVES THREE MEDALS

For his untiring work during the last decade with the Municipal Tuberculosis Sanitarium and for his great contribution to Tuberculosis control in Chicago and Cook County, Dr. Ernest E. Irons has received the "TB Medal", presented by the Tuberculosis Institute of Chicago and Cook County, and the "Medal of

Merit" presented by the City of Chicago.

Mayor Kennelly appointed Dr. Irons to the Board of Directors of the Municipal TB Sanitarium in 1947 and that same year he was elected President. The TB Institute's magazine, "The Challenge", reports that "under Dr. Irons' leadership, the Municipal TB Sanitarium has become a nationwide example of the modern treatment of TB. In addition to modernizing the Municipal TB Sanitarium's operation, Dr. Irons organized a program which enables hundreds of its patients to leave the sanitarium in a shorter period and continue their treatment at Municipal Tuberculosis Sanitarium clinics. This allows the Sanitarium to care for twice as many patients as it could handle ten years ago."

The third medal Dr. Irons has received is the World Medical Association's "Organization Medal" presented to him for his work in helping to organize the Association. He is on the Association's Board of Directors—United States Committee.

In July, Dr. Ladislav J. Meduna was in London, England, for the Royal Medico-Psychological Association meeting where he presented a paper on "Biological and Pharmacological Treatment in Psychoses." Dr. Meduna was made an Honorary Member of this Association.

Dr. Fay H. Squire will go to Washington, D.C. in September for the American Roentgen Ray Society meeting.

FILM WINS AWARD

Drs. James W. Merricks and R. Kennedy Gilchrist received word from Brussels that their film, "The Gilchrist-Merricks Substitute Bladder," won the "Gold Medal" in the International Competition for Urological Films held during the Congress of the Belgian Urological Society in June in conjunction with the Brussel's World's Fair. Approximately sixty films from all parts of the world were entered in the competition.

This film was produced, directed and partially photographed by Dr. Merricks with Dr. Gilchrist performing the surgery.

At the American Medical Association meeting in San Francisco, Dr. Charles V. Heck had an exhibit on fracture treatment. At this same meeting, Dr. Edwin F. Hirsch, Chairman of the Section of Pathology and Physiology, gave the Chairman's Address. His subject: "An Analysis of the Causal Factors of Atherosclerosis."

As delegate from the Illinois State Medical Society, Dr. Norris J. Heckel attended the AMA meeting, and in late September, Dr. Heckel will attend the Mississippi Valley Medical Society meeting in Chicago. He is Chairman of the Board of Trustees of this Society.

The Chicago Surgical Society recently honored Dr. Edwin M. Miller at their Past-President's dinner held in conjunction with their Annual Meeting. Dr. Miller served as the Society's President in 1940-41.

Drs. John W. Curtin and Hushang Javid have been elected to Membership in this Society.

In June, Drs. Thomas J. Coogan, Paul H. Holinger, Oglesby Paul, and Carl Davis, Jr. attended the Annual Meeting of the American College of Chest Physicians in San Francisco. Dr. Davis was elected to Membership in this College; Dr. Coogan presented a paper entitled "Hypertension"; and Dr. Paul moderated a panel on "Coronary Heart Disease."

While on the coast, Dr. Coogan also attended the American Therapeutic Society meeting, of which he is Chairman of the Council; Dr. Holinger delivered a paper before the American Medical Association on "Bronchopulmonary Obstruction in Children: Bronchial Hygiene;" and Dr. Davis attended the meeting of the Society for Vascular Surgery.

In September, Drs. Holinger and Benjamin M. Gazul will go to Tokyo to attend the Fifth International Congress on Diseases of the Chest, where Dr. Holinger will present a paper on "Bronchial Obstruction Due to Vascular Anomalies." Dr. Gazul is Chairman of the Section on Pediatric Cardiology for this Congress.

Late in September, Dr. Paul will give papers on "Cardiovascular Complications of Diabetes" and "Cardiac Problems in the Aged" before the Kentucky State Medical Association in Louisville.

Drs. George W. Stuppy and Evan M. Barton attended the American Rheumatism Association meeting in San Francisco in June.

SOMETHING NEW—A "TELEPOSIUM"

An unique method of using a two-way closed circuit telephone to bring together the speaker and his medical audience, the "Teleposium" was introduced recently to Presbyterian-St. Luke's.

Dr. Carl W. Walter, Associate Clinical Professor of Surgery at Harvard Medical School and Surgeon at Peter Bent Brigham Hospital, spoke via telephone from his office in Boston. His medical audiences were located in Presbyterian's North Amphitheatre and at the University of Illinois Research and Educational Hospitals.

Questions asked of Dr. Walter were submitted in advance by members of the audiences to Dr. Edward J. Beattie at Presbyterian, and to Dr. William J. Grove at the University of Illinois. The audiences were able to hear all conversations through amplifiers.

The subject of the "Teleposium" was "Control of Sepsis, with Special Reference to In-Hospital Infections."

DR. FENN HEADS NATIONWIDE PROJECT

The American College of Physicians is engaged in an attempt to discover a method of evaluating the quality of internal medicine as practiced in hospitals throughout the country and to elevate the standards when it appears necessary. Dr. G. K. Fenn is Director of this project.

In the past two years, about 200 hospitals have been surveyed and work is still proceeding. At the present time they are testing a method of self-evaluation. According to Dr. Fenn, "this method requires that each of a selected group of hospitals evaluate the quality of care in their own hospital and we hope to develop a uniform method of evaluation that will permit the hospital to know wherein its weakness lies."

Presbyterian-St. Luke's, together with many other hospitals in various parts of the country, is participating in this study.

(Editors' note: Many members of the hospital's Medical Staffs were in California in June for the Annual Meeting of the American Medical Association. However, we have reported only on other meetings attended at that time and program participation in the AMA meeting that have been brought to our attention.)

NEW INTERNS WELCOMED

On July 1, forty-nine young doctors began their year of internship at Presbyterian-St. Luke's Hospital. Twenty-one are serving at Presbyterian and twenty-eight at St. Luke's.

The new interns represent nineteen medical schools in this country as follows: University of Illinois; University of Rochester; Washington University (St. Louis); Bowman Gray (Wake Forest College); Indiana University; Northwestern University; University of Minnesota; Marquette University; Beaumont (Texas) College of Medicine; State University of New York; University of Buffalo; Tulane University; University of Chicago; University of Miami; University of Louisville; George Washington University; St. Louis University; New York Medical College; and Baylor University.

In addition, the following medical schools throughout the world also are represented: University of Paris; University of The Philippines; French Faculty of Medicine (Beirut, Lebanon); Faculty of Medicine (Lima, Peru); Catholic University (Belgium); King Edward Medical College (Pakistan); University of Colombia (South America); Queens University (Ontario); Tabriz Medical Faculty (Iran); Ankara University (Turkey).

FIRST "MERGED" COMMENCEMENT

Commencement exercises for one hundred forty-four student nurses graduating from Presbyterian-St. Luke's Hospital will be held on the afternoon of September 12 at Orchestra Hall. Dr. Clarence N. Wright, a Clerical Trustee of the hospital and Pastor of the Ravenswood Presbyterian Church, will deliver the address. Seventy-four of the seniors have received their nursing education at St. Luke's, and seventy at Presbyterian.

Mr. John P. Bent, President of the Board of Trustees, will present diplomas to the graduates. Bishop Gerald Francis Burrill and Hospital Chaplains, Dr. Louis W. Sherwin and Rev. Richard Young, also will participate in the exercises. The day's events will include a breakfast, sponsored by the Woman's Boards, for seniors, guests, and faculty.

PUBLICATIONS WIN AWARDS

At the Annual Meeting of the Welfare Public Relations Forum, Presbyterian-St. Luke's Hospital received two of the Forum's "Helen Cody Baker Awards." The purpose of the awards program is to recognize outstanding public relations efforts by health and welfare agencies in the Chicago area. The awards are presented annually in honor of Helen Cody Baker, one of the founders of the Welfare Public Relations Forum, and for many years associated with the Welfare Council of Metropolitan Chicago.

A second place award in the Annual Reports category was received for the hospital's 1956-57 Annual Report. A first place award in the Basic Interpretive Piece category was received for a brochure entitled "Visitorama". The latter was prepared primarily for tour groups to tell the story of the hospital's future and was printed in the hospital Print Shop.

DEPARTMENT HEAD APPOINTED

Dr. Karl S. Klicka has announced the appointment of Miss Elizabeth Price as Director of Medical Records for Presbyterian-St. Luke's.

Miss Price, who is first Vice-President of the American Association of Medical Record Librarians, served for a number of years as Director of Medical Records at Grant Hospital in Chicago.

SERVICE AWARDS PRESENTED

At the June meeting of Presbyterian's Woman's Board, forty-nine members of the Board were honored for twenty-five or more years of service to the hospital.

On behalf of the Board of Trustees, Mr. Alfred T. Carton presented certificates to these forty-nine members in appreciation of their loyal and outstanding service over the years. Special tribute was paid to Miss Helen Drake, Mrs. Harry C. Patterson, and Mrs. William R. Tucker, who received leatherbound Half-Century Certificates for over fifty years of service.

In May, at its Annual Hospital Day Reception, St. Luke's honored employees, Trustees, and members of its Medical Staff, Woman's Board and Women's Auxiliary (doctors' wives) for their years of service to the hospital.

Awards were presented by Mr. John P. Bent, President of Presbyterian-St. Luke's Board of Trustees.

Ten year service pins were awarded to two Trustees, including Mr. Bent; two members of St. Luke's Medical Staff; and sixteen St. Luke's employees.

Two Trustees, four members of St. Luke's Woman's Board and twenty-one employees received fifteen year pins.

Pins for twenty years of service were presented to three members of the Medical Staff and five members of the Women's Auxiliary.

For twenty-five years of service to St. Luke's, two members of the Medical Staff, five Woman's Board members, and nineteen members of the Women's Auxiliary received leatherbound Quarter-Century Certificates.

A Half-Century Certificate was awarded to Dr. Frank Brawley in recognition of over fifty years of service to the hospital.

Mr. Bent paid special tribute to twenty-three St. Luke's employees who have served the hospital for twenty-six or more years. For forty or more years of service, four members of this group received a \$50 U. S. Savings Bond; the others were given \$25 Bonds.

At an Annual Thanksgiving Tea next November, Presbyterian will honor its employees who have served the hospital for ten, twenty-five and forty or more years.

HOUSE STAFF AWARDS PRESENTED

Three members of Presbyterian-St. Luke's House Staff have recently been honored for outstanding work during the past year.

Dr. Robert A. Foley, a second year Medical Resident at Presbyterian, received the "Rush Medical Residency Award." This award (\$100.00 in cash) is presented annually by Presbyterian's

Medical Staff to the Resident considered "to have performed the most commendably toward both patients and staff and to have extended himself above the requirements of his job."

Dr. R. K. Gilchrist presented this award to Dr. Foley at Presbyterian's Interns and Residents Reunion on June 12 at the Knickerbocker Hotel.

Dr. Foley received his B.A. and M.D. degrees from the University of Illinois and served his internship at Presbyterian in 1955-56. He is now serving his third year medical residency at the hospital.

Dr. Ann Stitt, Resident in Surgery at St. Luke's, received the "Fremont A. Chandler Research Award" for her research project "Plasma Protein Level in Controlled Respiration."

This award (a certificate and \$100.00 in cash) was established anonymously in 1955 as a memorial to the late Dr. Fremont A. Chandler of St. Luke's Medical Staff. Its purpose is "to encourage original research in either the basic sciences or in clinical problems." Those eligible to receive the award are St. Luke's resident staff members who have served no less than twelve consecutive months of service.

Dr. Stitt, a graduate of the University of Pittsburgh School of Medicine, served her internship at St. Luke's and subsequently was appointed to a four year residency in surgery, one year of which was spent at Illinois Research Hospital. She has now left St. Luke's to serve a two year residency in thoracic surgery at the University of Pittsburgh Medical Center.

The third member of Presbyterian-St. Luke's House Staff to be honored was Dr. Richard de Swarte, a St. Luke's Intern.

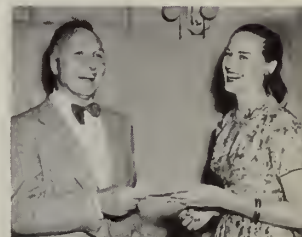

Dr. de Swarte received "The Dr. Will F. Lyon Annual Prize." In 1955, International Harvester Company established this award (\$300.00 in cash) in recognition of Dr. Lyon's services to the Company as Head of its Medical Department for thirteen years, and in recognition of his service to St. Luke's as a long-time member of its Medical Staff.

The award has been presented annually since 1955 to "the intern at St. Luke's Hospital who, in the performance of his appointed duties, best exemplifies the high devotion and dedicated service which have characterized Dr. Lyon's professional career."

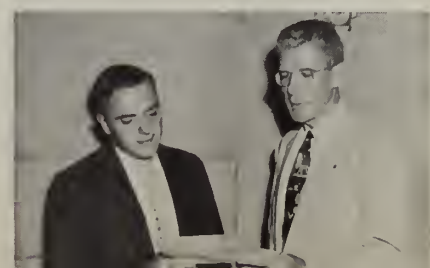

Dr. de Swarte, who received his B.A. and M.D. degrees from the University of Michigan, is now serving his residency in internal medicine at the University of Minnesota.

Dr. de Swarte and Dr. Stitt received their awards at St. Luke's Medical Staff's annual outing in Lake Geneva on June 25th.

Dr. Ann Stitt receives "Fremont A. Chandler Research Award" from Dr. Frank Jones.
